

Carbon Footprint Data

2022-2023

By Scope

Tonne of Carbon Dioxide Equivalent (tCO₂e)

● Scope 1	1
● Scope 2	3
● Scope 3	103

Total: 106.58 tCO₂e

The main output of AIA's carbon footprint are **Scope 3 emissions** (indirect GHG emissions that occur in upstream and downstream activities).

This includes:

- business travel
- employee commuting
- purchased goods & services
- fuel & energy related activities
- waste generated in operations

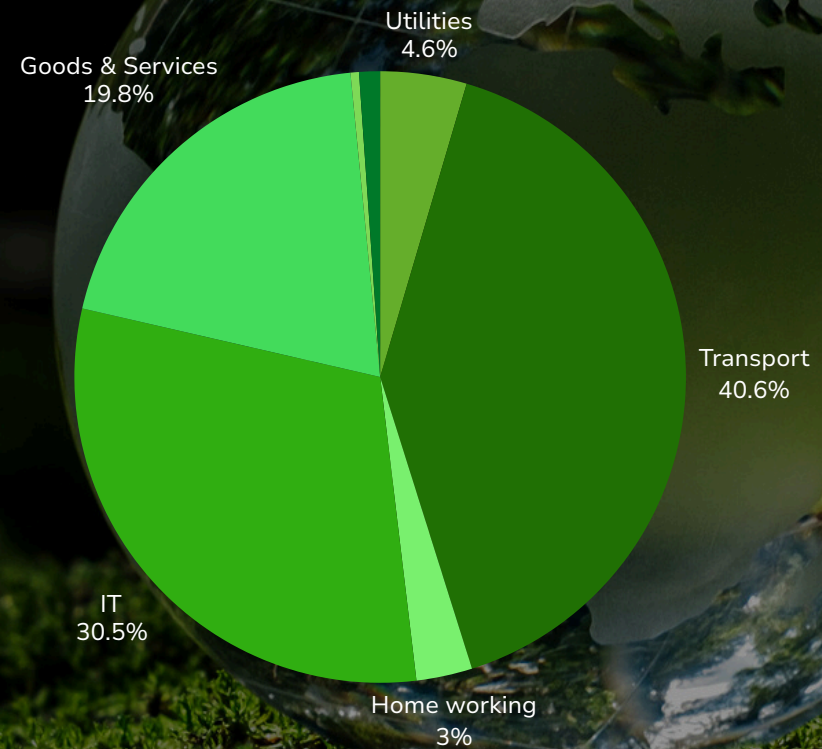

By Category

Tonne of Carbon Dioxide Equivalent (tCO2e)

Transport	43
IT	33
Goods & Services	21
Utilities	05
Home working	03
Other office procurement	1.1
Food & Drinks	0.5

Total: 106.58 tCO2e

The largest contributors to AIA's CO2 emissions are **Transport, IT, and Goods & Services.**

AIA is currently exploring a range of initiatives aimed at minimising its environmental impact across operations. From evaluating energy-efficient practices to considering greener technologies and processes, AIA is focused on implementing meaningful changes that support a more sustainable future.
